Instructions for authors:

MANUSCRIPTS should be sent as e-mail attachments in Microsoft Word™ documents to email@email.com. Please include a short abstract. In addition, in order for the refereeing process to start, include a title page indicating that the work is original, has never been published before, and is not under consideration elsewhere.

The Title Page

You will also need to prepare a title page. This should include any information removed from the main manuscript document to safeguard anonymity. The title page **will not** be sent to peer reviewers.

Your title page should include:

- Article title
- The full list of authors including all names and affiliations.
- **The listed affiliation should be the institution where the research was conducted.** If an author has moved to a new institution since completing the research, the new affiliation can be included in a note at the end of the manuscript – please indicate this on the title page.
- **Everybody eligible for authorship must be included at the time of submission**
- Contact information for the corresponding author: name, institutional address, phone, email
- Acknowledgments section
- Statements and Declarations section
- Any other identifying information related to the authors and/or their institutions, funders, approval committees, etc., that might compromise anonymity.

The preferred format is Word. There is no need to follow a specific template when submitting your manuscript in Word. However, please ensure your heading levels are clear, and the sections clearly defined.

The maximal length of an article in *JPCSS* is 8,000-10,000 words including bibliography and footnotes. Submissions should not exceed the word limit.

The text file should be presented in the following order:

i. A short informative title that contains the major key words. The title should not contain abbreviations;
ii. A short running title of less than 40 characters;
iii. Abstract and keywords;
iv. Main text.

Figures and supporting information should be supplied as separate files.

References:
Manuscripts should be double-spaced throughout, with footnotes in the Chicago Footnote Style (please refer to Chicago Manual of Style 17th edition, notes and bibliography https://www.chicagomanualofstyle.org/tools_citationguide.html). All bibliographic information should be placed in the footnotes, which should be formatted according to the Chicago style.
